WHAT IS THE ECSA CREDENTIAL?

ECSA[™]

EC-Council Certified Security Analyst

The ECSA penetration testing course provides you with a real world hands-on penetration testing experience and is a globally accepted hacking and penetration testing class available that covers the testing of modern infrastructures, operating systems and application environments while teaching the students how to document and write a penetration testing report.

The ECSA pentest program takes the tools and techniques you learned in the Certified Ethical Hacker course (CEH) and elevates your ability into full exploitation by teaching you how to apply the skills learned in the CEH by utilizing EC-Council's published penetration testing methodology

- Focuses on pentesting methodology with an emphasis on hands-on learning
- The exam will now have a prerequisite of submitting a pentesting report
- The goal of these changes is to make passing ECSA more difficult; therefore, making it a more respected certification

ECSA Testimonials

“ I am happy to announce that I am already an EC Council ECSA certificate holder. I definitely can recommend the ECSA programme for those of you who are looking for shaping their penetration testing skills and establishing a sophisticated framework of vulnerability assessment methodology.

- Lyubomir Tulev, CCISO, ECSA, CEH, CHFI, CEI

“ My EC-Council's learning experience was exceptional. I was astonished by the comprehensive curriculum of the EC-Council Certified Security Analyst (ECSA). When comparing this with my earlier experience, ECSA is just outstanding. Penetration testing and its methodologies were the most attractive part of the complete program.

InfoSec professionals should opt for this industrially accepted program as it enhances your ability to understand the approach of a malicious hacker and to take countermeasures, accordingly.

- Lokman Hakim, ECSA

“ Just received my ECSA certificate from EC-Council, it's the second one this month and the third one in the past 20 days. Don't listen to those who say you can't do it. Listen to yourself and just go ahead breaking the notion of what's possible and what isn't. Loving every moment of it!

- Aditya Anand, ECSA

“ EC-Council gave me an experience that I will never forget! The whole EC-Council Certified Security Analyst (ECSA) training enlightened me with advanced information security knowledge. I feel my existing technical knowledge has reached another level with the EC-Council Certified Security Analyst (ECSA) program. This is the first program that I really loved. It has real-time virtual lab sessions with the latest hacking tools, intelligent trainer, and the simplified, yet detailed training content.

I'd recommend the ECSA program to all the IT professionals who want to sharpen their penetration testing skills.

- Yuan Zheng, ECSA

“ Once I started learning ethical hacking with Certified Ethical Hacker (CEH), I desired to learn more about it. That's when I decided to opt for the EC-Council Certified Security Analyst (ECSA) program. The courseware was incredible and everything that I learned was solidified with the real-time lab sessions. It was an amazing experience to use advanced hacking tools, techniques, and methodologies which summed up the whole program. The best part is that I don't feel like I attended a "death by PowerPoint" boot camp. I know I walked away with real knowledge and practically applicable skills that can immediately be put to use.

ECSA literally covers everything that a security analyst or a pen tester requires. I know my acquired skills give me an upper hand over the other InfoSec professionals. I am completely in awe of the whole experience and I would definitely recommend the ECSA and CEH programs of EC-Council.

- Joshua Banes, ECSA

“ My exceptional experience with EC-Council Certified Security Analyst (ECSA) program includes the brilliantly designed training content and state-of-the-art tools and techniques involved. I also enjoyed the hands-on practical demonstration of penetration testing in a real-time environment. The program covers all the major updates in the information security domain.

Along with that, following the NICE framework, the ECSA credential can get you a suitable job meant for your acquired professional skills. I would recommend ECSA to all information security professionals because it expands your existing knowledge to another extent.

- Franky Gunawan, ECSA

“ As I was aspiring to be into ethical hacking and penetration testing, I realized that EC-Council ECSA credential is really valuable to be a pentester. The course is interesting with lots of content to study and learn. The trainer is cooperative and highly professional.

The course material and the practical labs helped me to prepare for the exam and earn the credential. I recommend ECSA for every individual who is in security domain and want to be a great pentester. CEH is for learning methodologies and will be a good start for all aspiring ethical hackers.

- Aishwarya K, ECSA

ECSA EXAM DEVELOPMENT & EXAM ITEM CHALLENGE

Exam development is a pivotal process that emphasizes on the technical, structural, semantic, and linguistic quality of exam items. Exam quality checks are done by a team of independent experts and professionals to ensure that the exam items are clear, error-free, unbiased and/or unambiguous.

Development Process

An invaluable input from industry experts was considered in the ECSA exam development, especially on how the ECSA qualifications and credentials are exercised worldwide. The ECSA exam is meant to meticulously and unsparingly transcend ordinary knowledge so as to reflectively gauge the necessary knowledge and skill required by experts in the domain of penetration testing.

Development phases

The ECSA exam development process is comprised of 9 phases that cogently focus on optimizing the exam to reflect qualities of relevance, validity and reliability.

◆ Objective domain definition

Subject matter experts (SMEs) highlight the significant job functions of Security Analysis.

◆ Job analysis

The job analysis identifies the tasks and knowledge important to the work performed by professionals in the field of IT Security; and, creates test specifications that may be used to develop the ECSA exam. The result of a job analysis is a certification exam blueprint.

The tasks and knowledge statements are transmuted into a survey that experts would use to rate, measure, and assess the skills and knowledge required. These ratings are used to rank the statements and determine the number of questions to stem from each exam statement.

◆ Scheme Committee Approval

EC-Council Scheme Committee, a group of experts, inspects and validates the objective domain and the approach used in the job analysis prior to the authoring or writing of the exams.

◆ Exam writing

SMEs write the exam items to measure the objectives stated in the exam blueprint. The exact number of exam items that they write is dependent on the feedback of the job analysis phase. The approved items are those that are technically, grammatically, and semantically clear, unbiased, and relevant.

◆ Standard setting

A panel of experts other than those who write the items will answer and rate all items to deduce a minimum passing or cut score. Scores vary from one exam to another due to the score dependence on the items pool difficulty.

◆ Final Scheme Committee Approval

The EC-Council Scheme Committee give their final approval of the whole process prior to the beta exam publication.

◆ Beta exam

Once the Scheme Committee approves the scheme a beta exam is published. Candidates are to sit for the beta exam under identical conditions to the real exam. The distribution of the beta exam scores enables EC-Council to assess and calibrate the actual exam for better quality.

◆ Final evaluation

The number and quality of items in the real live exam is determined by the scores and results of the beta exam. The analysis of the beta exam includes difficulty of items, capability of distinguishing level of candidates' competencies, reliability, and feedback from participants. EC-Council works closely with experts to continuously inspect the technical correctness of the questions and decide the pool of items that will be utilized for the live exam.

◆ Final Exam Launch

ECC operate and oversee the administration of EC-Council certification exams in their centers around the world.

If the candidate believes that a specific part of the ECSA exam is incorrect, he/she can challenge or request evaluation of the part in question via the steps enumerated below. This should be done within three calendar days of the exam day. Such a process is necessary to identify areas of weakness or flaws in the questions but the exam itself cannot be re-scored. Nevertheless, all possible efforts are not spared to assure the candidate's satisfaction. The candidate's feedback is paramount to EC-Council certification exams.

Steps for challenging exam items

1. Fill and sign EC-Council Exam Feedback Form as detailed as possible. The detailed and clear description of the challenge will accelerate the review process. No candidate's exam item challenge of the exam's items will be considered without completing the form.
2. The form should be submitted within 3 calendar days from exam date to certmanager@eccouncil.org with the subject line typed "Exam Item Evaluation". Only requests received within 3 working days from taking the exams will be reviewed.
3. The candidate must fill a separate form for each exam item he/she is challenging.
4. EC-Council will acknowledge receipt of the request by email. This may include a conclusive result of the evaluation, or an estimated time for the evaluation process to be completed and results to be shared with the candidate.

EC-Council Exam Feedback Form

Use this form to describe in detail the specific reasons you are challenging an EC-Council Certification exam item. Include your contact information, registration ID, the number and name of the exam, the date you took the exam, and the location of the testing center. Please provide as much detail as possible about the item to expedite review. Your challenge will not be accepted for evaluation unless this form is complete.

Within three calendar days of taking the exam, submit this form by e-mail to certmanager@eccouncil.org with "Exam Item Evaluation" in the subject line. You must submit a separate form for each exam item you are challenging.

Your submittal will be acknowledged through e-mail. At that time, you will receive either the result of the evaluation or, if more time is needed for evaluation, an estimate of when you can expect a decision.

ECSCA Credential Renewal

Your ECSCA credential is valid for 3 years.

To renew your credential for another 3-year period you need to update your EC-Council Continuing Education (ECE) credit account in the EC-Council Delta portal and submit proof of your earned credits. To maintain your certification, you must earn a total of 120 credits within 3 years of ECE cycle period.

The credits can be earned in many ways including attending conferences, writing research papers, preparing for training classes in a related domain (for instructors), reading materials on related subject matters, taking an exam of a newer version of the certification, attending webinars, and many others.

If you fail to meet the certification maintenance requirements within the 3-year time frame EC-Council will suspend your certification. Your certification will be suspended for a period of 1 year unless you earn the required 120 ECE credits to maintain/renew your certification.

If you fail to meet certification maintenance requirements during the suspension period your certification will be revoked. You will need to take and pass the certification exam again to earn the certification.

If you hold multiple EC-Council certifications, credits earned will be applied to all active certifications.

For full details regarding the ECE Policy please refer to the next section.

EC-Council Continuing Education (ECE) Policy

1. REASONS FOR INTRODUCTION OF ECE SCHEME

All legitimate and credible certifications have a re-certification program. In fact, ANSI/ISO/IEC 17024, a quality accreditation body requires credible certification providers to have their own re-certification program. Requirement 6.5.1 states, “The certification body shall define recertification requirements according to the competence standard and other relevant documents, to ensure that the certified person continues to comply with the current certification requirements.”

Continued competency can be demonstrated through many methodologies such as continuing professional education, examination (often not re-taking the original exam but an exam that would be at a higher level), or portfolios (when there is a product involved). The fact is there needs to be a time limit for the certification to ensure the consumers that the person has up-to-date knowledge.

Therefore, several governmental agencies are mandating accreditation of certifications in fields such as IT, Crane Operators, and Selling of Securities to the elderly.

Certification’s main purpose is to “protect the public/consumers” NOT to protect the profession. When health, safety and security are at risk, certification is needed and it cannot be given for a “lifetime”. It is generally noted that, if professionals are not required to maintain their knowledge and skills in their profession, they won’t. Today, credible organizations within professional domains require their members to provide evidence of a continuous learning as a basis for maintaining their license.

Differentiation

The ECE will brand, differentiate and distinguish a certified member as dedicated IT Security professional if he/she is willing to continuously learn and share knowledge to keep abreast of the latest changes in technology that affects the way security is viewed, deployed and managed. This is a key requirement of employers internationally and EC-Council being a major certification organization; supports it.

How does it work?

Once a candidate becomes certified by EC-Council, the relationship between EC-Council and candidate will always be governed by the EC-Council Candidate Certification Agreement which candidate must agree to prior from receiving your certification. This agreement is also provided at <https://cert.eccouncil.org/images/doc/EC-Council-Certification-Agreement-4.0.pdf>

If a certified member earned certification/s that are included under the ECE scheme, he/she will have to achieve a total of 120 credits (per certification) within a period of three years. If a member holds multiple certifications, credits earned will be applied across all the certifications. However, effective January 1st, 2013, each certification will have its own ECE recertification requirements within its respective 3-year ECE window.

The credits can be earned in many ways including attending conferences, writing research papers, preparing for training classes in a related domain (for instructors), reading materials on related subject matters, taking an exam of a newer version of the certification, attending webinars, and many others. Qualified ECE activities must have been completed within ECE program's 3-year window and must be submitted in only one ECE 3-year window.

2. RECERTIFICATION

Effective January 1st 2009, all EC-Council certifications will be valid for three years from the date of certification. During the three year period, the certification must be renewed by participating in EC-Council Continuing Education (ECE) Program.

For members who were certified prior to 2009, their ECE period will be from January 1st 2009 until December 31st 2011. For their first ECE Scheme Period (2009-2011), they are only required to meet a total of 120 ECE credits By March 31st 2012.

Upon completion of the 3 year ECE program and meeting the requirements, the member's certification validity will be extended for another three years from the month of expiry.

3. SUSPENSION, REVOCATION & APPEAL

SUSPENSION

If the certified member fails to meet certification requirements within the 3-year time frame, EC-Council will suspend his/her certification.

Suspended members will not be allowed to use the certification logos and related EC-Council membership benefits.

Suspended members must remediate their suspension within a maximum period of 12 months from the date of the expiry of the 3-year time frame. Failing which, the member's certification and status will be revoked and the member will need to challenge and pass the certification exam again to achieve certification.

Suspended members that subsequently meet the 120 ECE credit requirements within the specified 12 months deadline from the date of the expiry of the 3-year time frame will be reinstated as a member in good standing and can enjoy the use of their certification logo and related EC-Council benefits. However, the reinstated member will have only a reduced period to achieve another 120 ECE credits for their next recertification window. "Reduced period" refers to a time frame of 3 years less the suspension period.

REVOCATIONS

If member fails to meet certification requirements during the suspension period, he/she will have the certification revoked and will no longer be allowed to continue usage of the certification logo and related benefits. Members whose certification is revoked will be required to retake and pass the respective new exam to regain their certification.

APPEALS

Members whose certification has been suspended or revoked due to non-compliance of certification requirements may send in an appeal in writing to EC-Council. This appeal letter must be received by EC-Council within ninety (90) days of the suspension/ revocation notice, providing details of the appeal and reason(s) for non-compliance.

4. Audit Requirements

Certified members are required to maintain sufficient evidence to show your involvement in activities that earns you ECE credits. There is no requirement to submit evidence until it is requested for specifically by EC-Council.

5. Important Notice

Please note that the above is subject to change from time to time without prior notice. EC-Council reserves the right to make changes as required in order to maintain the reputation and recognition of its certifications and credentials. However, best effort will be used in informing members of changes via the website.

Below is a list of FAQs :

Appeal Form v2

EC-Council

EC-Council adapts the term appeal as a reference to the mechanism by which a candidate/member can request the reconsideration of an EC-Council decision or exam. The appeal applicants should fill EC-Council Appeal Form and attach all supporting evidence. For instance, if the applicant is seeking EC-Council's decision in relation to the exam, for example its equipment, materials, content, scheduling, registration, or proctoring, he/should submit EC-Council Appeal Form, EC-Council Exam Feedback form and exam transcript.

If the appeal is related to an EC-Council exam, the appeal request must be submitted to certmanager@eccouncil.org seven (7) calendar days from exam date. All other appeals must be submitted to certmanager@eccouncil.org within sixty (60) calendar days from EC-Council's written decision. Appeals received beyond the above-mentioned timeframe would not be reviewed.

The appeal process is comprised of three primary stages:

Stage 1: EC-Council

EC-Council will inspect and scrutinize closely and thoroughly the candidate's appeal before providing a final decision. Technical issues like power outages, system crash, exam items will be forwarded to the testing company (ECC) to advise whether there is valid grounds for appeal. EC-Council will provide the candidate with the appeal results within 30 days from receipt of candidate's appeal request.

Stage 2: Scheme Committee

While EC-Council would exert every effort to resolve all matters in a fair and objective manner, EC-Council gives the applicant the right to appeal to EC-Council Scheme Committee Board if he/she is not satisfied with EC-Council's decision. The Scheme Committee will verify the intactness of all events and processes and provide EC-Council with its final decision, and EC-Council would communicate the decision to the candidate.

The Scheme Committee meets once every quarter (Jan, April, July, Oct). Only appeal requests received at least 30 days before the meeting will be reviews at that session. Appeals received less than 30 days from the Scheme Committee meeting will be reviewed in the subsequent meeting.

Stage 3: Honorary Council

The appeal will only be put forward to the adjudication of a subcommittee of the EC-Council Honorary Council, which will comprise of no less than 3 members; if the applicant is not satisfied with the Scheme Committee final decision. The request should be submitted to https://eccouncil.zendesk.com/anonymous_requests/new within thirty days from the date of the Scheme Committee written decision. Appeals received beyond the 30-days timeframe would not be reviewed.

The Honorary Council meets once every year. Only requests received at least 30 days prior to the Honorary Council meeting will be review at that session. Appeals received less than 30 days from the Honorary Council meeting will be reviewed in the subsequent meeting. The decision concluded by the Honorary Council is irrefutable and is obligatory to all parties involved in the appeal.

EC-Council Appeal Form

If the appeal is related to an EC-Council exam, the appeal request must be submitted within three (3) calendar days from exam date. All other appeals must be submitted within sixty (60) calendar days from EC-Council's written decision.

Kindly submit your appeal form to certmanager@eccouncil.org

Change in Certification Scope

EC-Council shall, where applicable, give due notice to interested parties and certified members on changes in scope of certifications, rationale behind change, and effective dates of change. Such changes will be published on the EC-Council Certification website (<http://cert.eccouncil.org>).

EC-Council shall verify that each certified member complies with the changed requirements within such a period of time as is seen as reasonable for EC-Council. For instance, old versions of certification exams are retired six months from the date of official announcement of the launch of the new version of the exam. These changes will only be done after taking into consideration EC-Council Scheme Committee views.

EC-Council's Scheme Committee is a member based network of volunteers that are recognized by EC-Council as experts in the field of information security. They are carefully selected from the industry and are committed to the information security community.

More importantly, they remain an independent voice for the industry and are responsible to advise EC-Council in the development and the maintenance of key certification-related matters.

Changes may be suggested by any stakeholder of EC-Council, but changes will be verified with documented psychometric analysis conducted by experts. Psychometric analysis would be conducted to determine the certification scope every three years or sooner; whereas evaluation would be conducted every year to ensure if amendment in scope of certification is required.
